Distribution No. 7/01/79

900 Model

Subject: Pirelli P6 Size 195/60 HR15 and
Goodyear 175/70 HR15

Pirelli 195/60 HR15

These tyres are fitted as standard equipment to the 3-door 900 Turbo. Dealers will have noticed the high cornering power that is possible with these tyres. We can now approve the fitting of these tyres to all models fitted with 5" and 5.5" rims provided all four road wheels are fitted with these at the same time.

We are sure this will be of interest to 1978 Turbo and EMS owners.

Please note that on all models prior to '79 specification there is a tendency for the tyre to contact the rear inner wing on full suspension deflection. This normally only results in a polish mark on the inner wing. This tendency should be mentioned to owners prior to purchase of these tyres.

The spare can be left with its original equipment tyre if required, but then the spare must be regarded only as a "Get you Home" device.

Goodyear 175/70 HR15

These tyres are now only available from SAAB. Dealers should therefore consider holding a number of these tyres in stock.
